

GiftList Launches Version 3.0 to Help Organize Gift Giving for Christmas

A complete gift planning solution, GiftList allows users to create and share lists with friends/family and for those loved ones to talk about and reserve gifts so the user always gets what they're hoping for.

Tallahassee, Dec 9, 2019 (Issuewire.com) - MyGiftListApp.com is pleased to release a new updated and improved version of the gift planning app that was updated earlier this Fall. The application can be found online at <https://mygiftlistapp.com/>, on the Apple store at <https://apps.apple.com/us/app/gift-list-a-gift-sharing-app/id1440596904>, or on the Google Play store at <https://play.google.com/store/apps/details?id=com.grappetite.giftlist>.

In this update, just in time for Christmas planning, GiftList has added the option to “favorite” lists and add them to a special “Lists I’m Watching” section as well as the ability to add gifts that a user plans to buy without someone being on the GiftList app.

GiftList sets itself apart as the most robust gift planner for Christmas 2019. The app plays three roles: helping a user make their own wish list, encourage users to collaborate with others on loved ones’ wish lists, and getting users organized so they know what they are buying for Christmas. Users can search in the app for gift ideas or add gifts to their lists through GiftList’s Google Chrome and Firefox Extensions or add suggest gift ideas on loved ones’ lists and chat with others, reserving what they want to get from someone else’s list. Reserved items get added to a user’s “I’m Buying” list allowing them to easily track what they are planning to buy.

andy@mygiftlistapp.com Christmas giving easy. Get what you want, give what they want this Christmas.

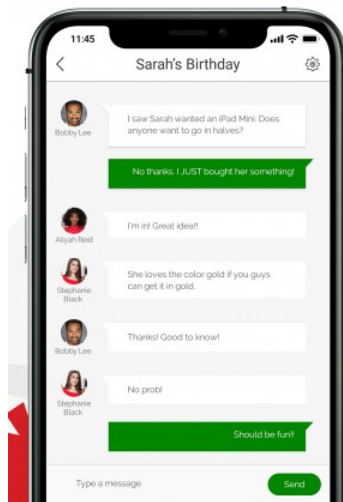

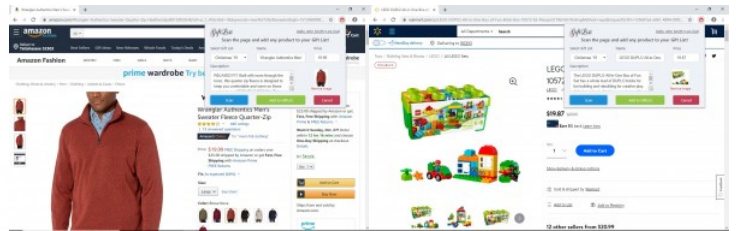

About GiftList:

GiftList was built to help streamline gift-giving by helping users manage what they want and what they are getting for friends/family. GiftList is the only gift registry app that includes group chat so friends/family can plan together what to get for a loved one.

Built by the development team at Grappetite, a multi-national app and web development company, the app comes out of 11 years of experience building products for ourselves and for clients around the world.

Chat with others about your friends' lists (without them knowing), ask specifics, or plan to go halfzies.
