

Massage Gun PRO Introduces Affordable High Powered Device With 4 Hour Run-time Battery

Massage Gun Pro's newest launch disrupts the massage gun niche with an affordable offering and 4-hour run-time per charge. The new device comes stacked with a 20 speed brushless motor, 4 hour run-time battery, and touch screen LCD panel.

Houston, Dec 6, 2019 ([Issuewire.com](http://www.Issuewire.com)) - **Massage Gun Pro**, specializing in health and fitness products, today announces the launch of its latest Percussion Therapy Massage Gun. The Massage Gun PRO is designed to accelerate muscle recovery and muscular functionality pre- and post-workout.

Massage Gun PRO's latest [massage gun](#) delivers deep tissue massage with controlled 20 variable speed settings. The new battery architecture boasts the power of 2600 mAh, capable of running for 4 hours on a single charge.

The newly designed 24V brushless motor delivers high impact performance while reducing noise to under 58 decibels. The Massage Gun PRO is now available [online](#). To better understand the features of the Massage Gun PRO, watch the brief visual presentation - [Click Here](#). For additional information about the Massage Gun PRO specifications, visit www.massagegun.pro.

"The new Massage Gun PRO was designed to facilitate a high-end device offering, affordable to consumers and professionals. The craftsmanship and performance are on par with machines twice or three times the price," said James Martin, Sr. Product Manager at Massage Gun PRO.

The Massage Gun PRO was re-designed with a state of the art, 24V brushless motor, capable of providing a vigorous, yet quiet massage. The most annoying element in this niche previously, was the excruciating noise, especially at higher speeds, which was one of the motivations and challenges in the development of the new Massage Gun PRO. The Massage Gun PRO launched its quiet percussive massage gun that can give you muscle pain relief. It's an all-in-one solution to workout recovery with the capability of reducing muscle soreness by over 60% in under 30 seconds.

The Massage Gun PRO will help athletes and consumers alike, achieve their fitness goals by recovering faster and being able to stay on track longer. Physio Therapists have been using similar devices for some time now, but the idea of recommending one to a consumer didn't seem probable due to the hefty price tags. The Massage Gun PRO is an affordable, high-quality solution that's disrupting the massage gun industry. It's massive battery, 24V brushless motor, and 20-speed gear settings offer professionals and consumers a one size fits all model.

The [Massage Gun PRO](#) is a Percussion Massage Gun that can be used by men or women and even young adults before training to loosen up the muscle groups and post work-out to accelerate muscle recovery time. Days spent at the gym no longer have to be followed by severe stiffness the next day. The Massage Gun PRO comes with 6 heads attachments, each designed to target specific muscle areas of the body. The lightweight design and easy-grasp handle provide a comfortable DIY experience for everyone. The high-performance massage gun will increase blood flow to help relieve sore muscles and aid in recovery time. The latest launch from Massage Gun PRO provides an affordable solution while incorporating all of the bells and whistles such as the 4-hour lithium battery, 20 variable speed settings, LCD touch screen, and 6 head attachments. Each unit comes in a handy travel bag for portability.

Massage Gun PRO's mission is to provide innovative solutions at affordable prices. [Percussion Therapy Massage](#) devices are the latest advancement in muscle recovery, and the new launch from Massage Gun PRO will provide an affordable, powerful, quiet, and comfortable massage that can be used by everyone.
