

Organic Energy Drink by Dark Dog Launches in the US Market

Miami Beach, Dec 17, 2019 ([Issuewire.com](https://www.issuewire.com)) - After many years of research and listening to the voice of customers, Organic Energy Drink by Dark Dog is happy to launch its product in the US Market.

Since 1995, Dark Dog, the Energy Drink Company, a very successful company that has been recognized worldwide for over two decades, has been working hard to meet the demands of health-conscious people. Quality is vital for Organic Energy Drink by Dark Dog; for this reason, they started a market research program focused on creating a healthy energy drink made with USDA Organic Certified Ingredients, Non-GMO Verified and with a great taste, and affordable to all.

This energy drink contains antioxidants from organic acerola berry, also known as acerola cherry, a superfruit with the richest content of natural Vitamin C, higher than other fruits tested like pineapple, cashew, guava, kiwi, orange, lemon, and strawberry. The average content of vitamin C on acerola berry is around 1.7 g/100 g of pulp. Perfect for promoting weight loss, collagen production, and a great aid in heart disease prevention.

Organic Energy Drink by Dark Dog has taken its time to understand the ever-increasing demand of consumers who are looking for a healthier alternative with great taste and energy-boosting drink that people would love. That's why they carefully selected the ingredients with energy-boosting properties, to provide their users with a caffeinated beverage with 114 mg of caffeine per can (equal to a cup and a

half of coffee) coming from the healthiest source of caffeine: Organic Green Bean Coffee, Organic Green Tea, and Organic Guarana.

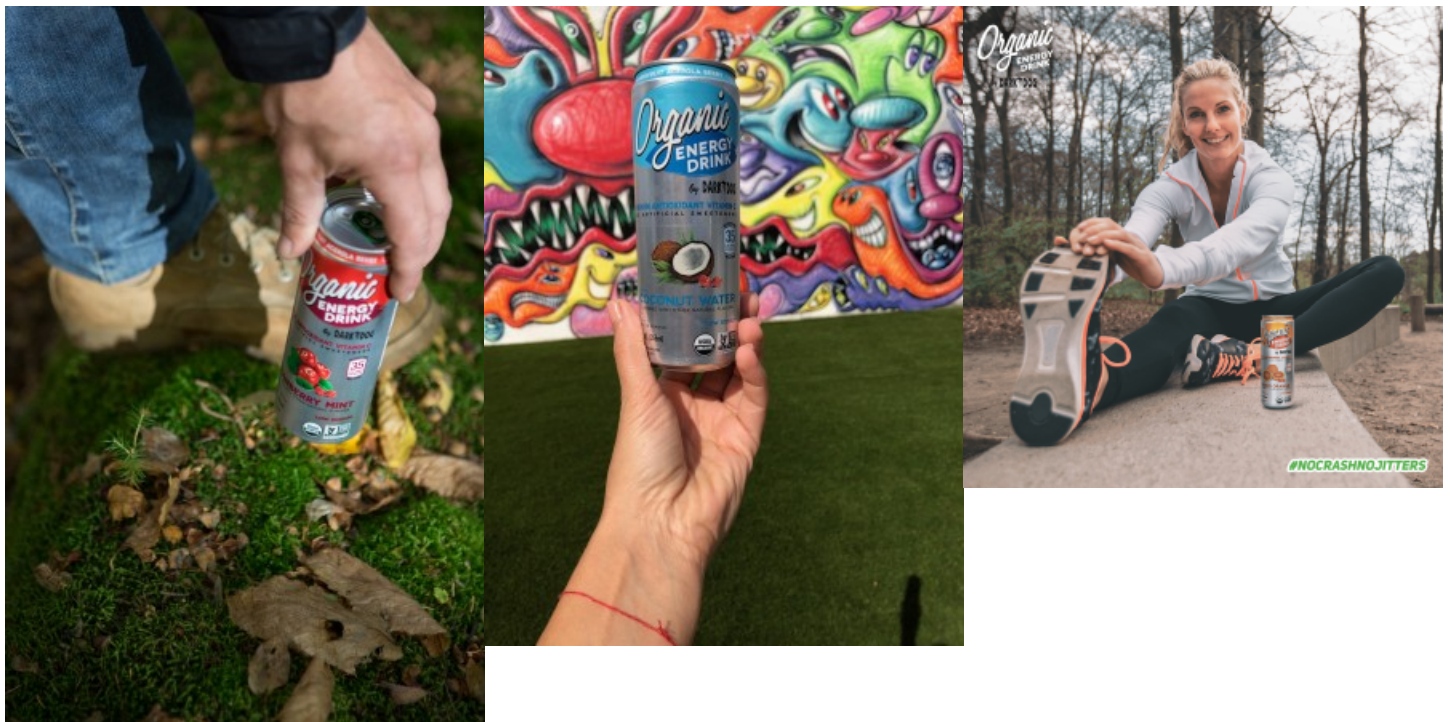

Dark Dog Organic comes in four different flavors: Original (Authentic Energy Drink flavor), Blood Orange, Cranberry Mint and Coconut Water, and packed with antioxidants and natural electrolytes to provide hydration and the 50% of daily recommended Vitamin C per can, for this reason it has been highly recommended as a pre-workout and post-workout during High-Intensity Workouts such as: CrossFit, Boxing, Insanity, Bootcamp or, bodybuilding.

About the Company:

The vision of Organic Energy Drink by Dark Dog is to reduce the carbon footprint by planting trees, and they are committed to ensuring that as a company, they will take care of the planet. They use organic products that typically require less energy to produce. This effort helps aid in a cleaner, and healthier climate and fight global warming.

Dark Dog is no stranger to energy drinks, the company was established in 1995 in Austria, and is a very successful company all over Europe and Latin America.
