

PowerCharge™ Electrifies the Market With a New Commercial Charging Station

New Pro-Lightning Series Offers Multiple Configurations and Power Levels

Rochester, Dec 13, 2019 ([Issuewire.com](http://www.Issuewire.com)) - PowerCharge™, a subsidiary of Moser Services Group, LLC, stays ahead of the EV charging market by introducing a new commercial electric vehicle charging station: ***Pro-Lightning Series***.

PowerCharge™ has designed its new *Pro-Lightning Series* to be powerful, durable, and flexible. These

heavy-duty electric vehicle chargers are ideal for the public, workplace, hospitality, and fleet use. “We have seen a substantial increase of electric vehicle charger installations in these verticals, so decided to build a premium unit to fill these needs”, said Mike Moser, President. Moser added: “This *Pro-Lightning* compliments our current *Pro-Series* and *Energy-Series* products and completes our line of commercial level 2 charging products”.

The *Pro-Lightning Series* is offered in multiple configurations; wall or pedestal mount, open or closed access, networked or non-networked, multiple power levels to match a facility’s available power, and multiple backend software options providing the most flexibility in the market. Changing configuration and power levels once in the field is easily accomplished providing peace of mind to the station owner.

Standard features include; commercial-grade components including a robust steel housing with automotive-grade powder coat finish, NEMA 4 rated for outdoor use in the toughest environments, built-in cable retractors to keep cables off the ground, and a modular design for easy maintenance and servicing.

The new *Pro-Lightning Series* is available to order for delivery in early 2020 through the select US and Canadian distributors.
