

Announcing the New HeliX Vertical Garden™ from Lettuce Evolve™, Sustainably Supporting up to 100 Plants!

Dallas, Jan 12, 2020 (Issuewire.com) - Announcing the Radically New HeliX Vertical Garden™ from Lettuce Evolve™,

After 10 years of research and development, Lettuce Evolve™ announces the launch of the HeliX Vertical Garden™ - an ecosystem-based planter that is the most Radically Simple and Sustainable way to Garden. Powered by fish, the system can legitimately save money on groceries by growing up to 100 plants, while fitting Beautifully on a Patio! Most people will go their entire lives without tasting food this fresh!

The HeliX Vertical Garden™ is Self-Watering: Fill the aquarium twice per month and it takes care of the rest. Self-Fertilizing: Built-In aquarium with fish inside that naturally fertilize your plants. No Soil & No Weeding: Special lightweight rocks eliminate weeds and make gardening a breeze. Grows Up To 3X Faster Than Soil: Full Eco-System delivers a constant supply of nutrients directly to the roots. No Harmful Chemicals or Pesticides: Take comfort in knowing exactly what is on your plate.

The system debuted to great excitement at the Masters of the Craft cooking competition for Marriott, hosted at the Sheraton Dallas. Hotels from all over Texas and Oklahoma were represented there, including the Ritz Carlton and Gaylord. The judges were top foodies with various credentials. The HeliX Vertical Garden™ was the centerpiece attraction at the event, and contestants picked and used plants from it during the competition for their plates.

Executive Chef Zeb from the Sheraton commented, “As an Executive Chef, I strive to provide our guests with the best experience possible, so the freshness of my ingredients is paramount. With the HeliX Vertical Garden by Lettuce Evolve, my petite greens won't be days or weeks old, they'll be living and fresh when we need them! The difference in taste and texture is undeniable. I am excited to use the HeliX Vertical Gardens in my hotel. Thank you Lettuce Evolve for producing a system that keeps our living greens as fresh as possible.”

Lettuce Evolve™ Founder John Murphy reflected that “After 10 years of building vertical gardens and implementing them in various climates around the globe, I feel like we've finally cracked the code on what we do. The new HeliX Vertical Garden is quite frankly, the coolest and most efficient Vertical Garden ever created. We are legitimately helping you save money and grow the Freshest Food you will ever taste.”

The HeliX Vertical Garden™ is available for order now at <https://LettuceEvolve.com>.

About Lettuce Evolve™

Passion all the way to the roots - Founder, John Murphy, created Lettuce Evolve™ to save his life. He got sick in 2009 and couldn't walk for years. In 2010 he drew up the first Aquarium-Powered Vertical Garden while being sick in bed. Like many people, organic food was too expensive for him to buy, but he needed the highest quality food to help heal his body. Stranded in the city and surrounded by concrete, he turned toward his bedroom to put his garden. He created a vertical garden to utilize the limited space that he had, while maximizing the number of plants he could grow to create a sustainable platform for growing 100% fresh organic fruits and veggies, without pesticides or fertilizers.
