

Jigsaw24 named to public sector framework

Crown Commercial Service *Supplier*

Nottinghamshire, Jan 13, 2020 ([IssueWire.com](https://www.issuewire.com)) - Leading Apple specialists Jigsaw24 have been named as a supplier on Crown Commercial Service's (CCS) Technology Products and Associated Services framework, which will enable them to work with public sector customers across the UK.

They have qualified for three of the four lots in the Technology Products and Associated Services framework.

Crown Commercial Service supports the public sector to achieve maximum commercial value when procuring common goods and services. In 2018/19, CCS helped the public sector to achieve commercial benefits worth £945m - supporting world-class public services that offer the best value for taxpayers.

It means the company will be able to provide hardware, software and associated services to central government bodies, local authorities, NHS trusts, charities and the voluntary sector from March 2020.

Jigsaw24, which posted revenues of £118.4m in the last financial year, currently works with large

enterprises, small businesses and educational organisations to deliver IT solutions for Apple and non-Apple environments.

Tim Bodill, Sales Director at Jigsaw24, said: “Our appointment to this framework reflects our position as a leading technology reseller and IT service provider.

“We offer flexible purchasing models and bespoke solutions that generate impressive returns on investment, so we are perfectly placed to work with councils and government departments while providing great value for money.

“By opening us up to new markets, this news will help us build on our recent strong performances and continue to grow as a business.”

A total of 42 different suppliers were listed across four separate lots in the Technology Products and Associated Services framework.

Jigsaw24 is one of the only Apple-centric providers to be appointed to the framework.
