

## Review and perspectives 2020 Atrad.io

**Riviere du Rempart, Jan 16, 2020 ([Issuewire.com](https://www.issuewire.com))** - Leading 100% automated platform in cryptos arbitrage, Atrad.io ends the year 2019 with a record return of 125% and, above all, more and more regularity in the monthly performance.

By way of comparison, €1000 invested with us at the beginning of January 2018 became €3125 net.

The same amount invested on Dow Jones index, in gold or in Bitcoins would be respectively worth €1155, €1153, €560 today.

In a crypto market that is still as active as ever and that is gaining its letters of nobility, the year 2020 looks very promising, with a monthly target that is sustainably above 7%. The launch of "Arbitrage Chain Trading" in the first quarter should also provide an interesting growth driver.

The [atrad.io](https://atrad.io) team wishes you a prosperous New Year!
