

Aaron London releases an inspiring infusion of Hip-Hop and R'n'B Life Don't Stress Me

Harrow Weald, Feb 9, 2020 (IssueWire.com) - **Aaron London**'s newest creation [**Life Don't Stress Me**](#), is something that blurs the line between smooth R'n'B and tough Hip-Hop with a sprinkle of meaningful lyrics. To those who have been pressing that snooze button on the producer then it's about time to introduce you.

The East London based artist was one half of the electric-pop duo, WØLVES, alongside fellow artist New Machine, who collaborated with the likes of **Jorja Smith, Plan B, Ed Sheeran, Joey Bada\$\$** and many more. Aaron has been slowly getting the attention of **Earmilk** and **The Fader** as part of that duo, but now as he spreads his wings from his producer box, Aaron is stepping out into the limelight and releasing music that shows you the greater extent of his abilities.

Life Don't Stress Me is a feel-good track with the soul behind the vocals and lyrics, whether that's from his writing, singing in falsetto and overall production of the track. It's about taking time for yourself and making sure you focus on your life, not everyone else's. A smooth backing vocal is ever-present throughout the track and a fresh beat has shown **Aaron London**'s capabilities not only as an artist but as a producer.

It's been a tough time for the world in most recent times, so this new track symbolizes happiness and chilled vibes to focus on our own life.

If his work as a producer/artist isn't enough, the musician is also in the editing process of releasing a brand new documentary about his life in music, living in East-London and the struggles he has come across.

Also, Aaron is currently pitching to Netflix for an animation show that he has animated himself. This is an artist who just doesn't stop, even creating a new track/video once a week on his Instagram, so this is someone to watch out for.
