

Cyfuture announces SOC 1, 2 and 3 Compliance

SOC is especially relevant for Software as a Service (SaaS) providers like Cyfuture as they manage large amounts of sensitive information on the cloud

Noida, Feb 5, 2020 ([Issuewire.com](https://www.issuewire.com)) - Cyfuture, a leading provider of enterprise hosting, cloud hosting, website hosting and data center services announced today that it has successfully completed Service Organization Control SOC 1, 2 and 3 Type 2 audits. Conducted by an independent service auditor, the audits affirm that Cyfuture's information security practices, policies, procedures, and operations comply with the rigorous SOC standards for security, availability and integrity.

The auditor's report includes a detailed description of the controls implemented by Cyfuture and an independent assessment of whether these controls are designed appropriately and working effectively. To receive a copy of independent service auditor's report, click [here](#).

As more and more data is moving to the cloud, data security and information security protocols have become important considerations for organizations that work with cloud-based platforms. SOC, a widely recognized 'gold standard' developed by the American Institute of Certified Public Accountants (AICPA), ensures a service organization's security measures are in accordance with today's cloud requirements. SOC is especially relevant for Software as a Service (SaaS) providers like Cyfuture as they manage large amounts of sensitive information on the cloud.

The completion of SOC certification bears testimony to Cyfuture's ongoing commitment to creating and maintaining the most stringent controls needed to ensure the highest quality of services for its clients. The organization recently bagged the prestigious ISO 27001:2005 certification, demonstrating its competence in managing its Information Management Security System, making information security an inseparable part of its business processes. The SOC is yet another milestone in Cyfuture's long list of accomplishments that has reinforced its position on security and compliance within the industry.
