

International Conference & Exhibition on Clean Energy to be held in Ottawa, Canada

Ontario, Feb 25, 2020 ([IssueWire.com](https://www.issuewire.com)) - The International Academy of Energy, Minerals & Materials, in Ottawa, Canada, has announced that it will be hosting the 2020 International Conference & Exhibition on Clean Energy (ICCE2020), from 24-26 August in Ottawa.

This highly interactive conference and exposition is designed to promote information exchange among scientists, technologists, engineers, entrepreneurs and exhibitors involved in energy sector, specifically in the area of clean/renewable energy.

“We are in an era in which there is a continuous progress in Energy technologies and ICCE2020 will provide a forum to exchange information, present new technologies and developments, and discuss the future direction, strategies and priorities in this field” stated the organisers.

More information on the conference can be found at <https://icce2020.iaemm.com>
