

Meet the Super Producer behind the hits of your favorites!

Bloomington, Feb 26, 2020 (Issuewire.com) - Antwan "Sci-Fi" Banks is no stranger when it comes to having an ear for music. Born and raised in Bloomington, IL he began his start with music as a drummer and organist in his church at a very young age. It was from there he realized that music was his passion. While in high school he began producing and making beats for local artists. He took it to another level and then produced for artists such as Rich The Kid, Cardi B, Miss Mulatto and Lil Yachty. He experienced his big break when he produced "Drip From My Walk" for upcoming artist Famous Dex. Drip from My Walk quickly became a nationwide anthem and "SciFiOnTheBeat" became an ad-lib you

anticipated. With his diverse engineering background and production, Sci-Fi is one person you always want to produce your beat.
