

ScanBizCards Releases Its Latest Android Version 7.0.1

Here's what's new with ScanBizCards v 7.0.1

With ScanBizCards, easily
convert your business card info
into a contact profile.

Arlington, Feb 12, 2020 ([IssueWire.com](http://www.issuewire.com)) - ScanBizCards recently released the newest version of its Android app, version 7.0.1. This version will be available across both its free (Lite) and paid (Premium) apps.

ScanBizCards also announced that it's reducing the price of its Android Premium app from \$2.99 to \$0.99 for a limited period.

"We've updated our app to make sure it's faster and more reliable for our users. With this latest update, we wanted to improve a key function of the app - the OCR," said Santosh Ramnani, Director Product Management and Client Success, ScanBizCards.

Here's What's New With 7.1

There are a couple of key enhancements with the latest update of our ScanBizCards Lite and Premium apps for Android, version 7.1:

- We've added a new OCR engine for better card scan results
- Scanning is 5X faster than the previous version

You can download the ScanBizCards [Lite app here](#) and the [Premium app here](#) on Google Play Store.
