

SFM Software Launched For Live Location Tracking & Monitoring of Field Employees

SFM software launched by Secninjaz to automate the field staff operations and to maximize the ROI of the Organizations.

SALES FORCE MONITORING

New Delhi, Feb 24, 2020 (Issuewire.com) - The Era of manual inspection and reporting overcame with revolutionary technologies. Now it has been easy to [track your field employees](#) sitting in your office just via a single click. Keeping the future technologies in mind, Secninjaz(a cybersecurity Firm) launched its salesforce monitoring software under the trademark named SFM.

Company's spokesperson Priyanka Sharma said - "We are all set to revolutionizing the salesforce operations with our software features. SFM not only tracks and monitors your field staff but also shows employee's daily task details, attendance, and auto-generated reports."

If we talk about SFM's features, this software works on Geolocation based technology. The whole software environment comprises an admin dashboard and an employee app. The employee application installed in the smartphone's of field staff and managers can track their live location from the admin dashboard.

"The reason behind organizations should use SFM - The features we are given, Employees can do instant conversations with each other and managers able to broadcast the important updates at once. Not only this customer management, Attendance Management, Expenses Management, Task Management, and automatic report generation distinct SFM from all other available Employee tracking software in the market" - said by Marketing Manager.

Further to the discussion about its design and functionality the company crafted it with a minimal and simple user interface. SFM can be easily operated by persons from managers level to a salesperson. The software suits any kind of organization.

This [salesforce monitoring software](#) will help the organizations to optimize their field staff for the Maximum ROI. it will reduce the cost involved in Field staff operations and all employee-related data can be recorded and viewed anytime for further analysis.

The company providing the monthly and yearly packages at very nominal prices.
