Madison Jaye Changes the narrative of religion by connecting the dots to spirituality

New York City, Feb 19, 2020 ([IssueWire.com](http://www.IssueWire.com)) - So, I recently I came across a TED x from international spiritual journalist Madison Jaye, and it made me think, what if we lived in a world with one religion? What if we had a thread that somehow connected those dots of miscommunication? What if the connector is spirituality? What if the internet is a new world that is meant to help us connect mankind?
