and adults*

*Get all the comfort and
affection when you're
nervous. Hold his paw 
& stay calm*

LOVE 

Houston, Mar 12, 2020 ([IssueWire.com](http://www.IssueWire.com)) - Did you know that about 15% of American adults have a dental phobia? That is why many dental practices have therapy dogs for nervous patients so they can make it through their visit to the dentist with minimal discomfort. **Dr. Farah Talib, DMD**, who is a trusted dentist in Texas has recently introduced a therapy dog at Angleton Family Dental where she has been working from the past many years. An alumnus of the prestigious University of Illinois College of Dentistry, Dr. Talib believes that having a therapy dog at the clinic works wonders in curbing dental anxiety in patients. Holding a paw & feeling empathy from an animal while they are in the dental chair makes the whole experience less painful for them.

Apart from Angleton Family Dental, **Dr. Farah Talib** works with two other very famous dental clinics in Texas - Bella Dental and Bayside Dental. Dr. Farah is committed to continuing her education so she can stay on top of the latest dental innovations & integrate them into her dental practice. She also stays current with the technological advances in the field of dentistry by reading journals and attending seminars.

About Dr. Farah Talib, DMD

Dr. Farah Talib received her **DMD** degree from the University of Illinois at Chicago. Later, she decided to move to Houston. At present, she is working with three leading dental clinics in Texas – Bella Dental, Angleton Family Dental, and Bay Side Dental where she provides comprehensive and affordable dental care services. The different dental care services include preventive care, dental exams, fillings, silver filling replacement, root canal, teeth whitening, dental bridges, dentures, crowns, extractions, and more.
