

DURAMAX PVC PANELS brings innovative vinyl wall panels to the masses

Innovative wall panel system engineered for high moisture environments

Montebello, Mar 4, 2020 (Issuewire.com) - Duramax PVC Panels (www.duramaxpvcpanels.com), the leading supplier in water resistant wall panels, is bringing **vinyl panels**, a superior solution to **FRP**, directly to buyers in the US. In the past, vinyl panels were only available wholesale to large facilities and industrial buyers, but now anyone in the United States can buy direct. Duramax PVC Panels has been around for more than 30 years in the vinyl industry and has been replacing **FRP panel** market share with their innovative **vinyl panels**. Duramax manufactures in Los Angeles, California, and ships nationwide. Get a free sample today by going to <https://www.duramaxpvcpanels.com/get-a-sample/>

To support this exciting news, Duramax PVC Panels has recently expanded its salesforce to support all customer design and installation needs. The growing company has a dedicated phone line for **wall panels** from 7am-4pm PST along with a shop, <https://shop.duramaxpvcpanels.com/>, empowering users to order **wall and ceiling panels** online. Expert consultative knowledge to support with design, quotes, and product details are all instantly available on and offline!

The company has had great success with projects in the **food processing facilities, high moisture environments, cannabis grow rooms, hygienic clean rooms, interior lining for car washes, hog farms, water resistant wash stations**, and much more:

<https://www.duramaxpvcpanels.com/applications/>. The panels are designed to be easy to install and a great solution to **indoor high-moisture environments**. Vinyl panels make up for all the inefficiencies of **Fiber Reinforced Plastic (FRP) Panels**. The company is revolutionizing the wall and ceiling industry with its vinyl panels. A total of 50 million square feet of Duramax PVC panels have been installed across US and Canada. The vinyl panels are tested with ASTM E84 with a class A fire grade and ASTM D4226-16 which gives the panel a mean failure energy of 252 in-lbs (29 J). The vinyl panels meet all LA County Department of Buildings And Safety Codes, and meet CFIA and FDA requirements for hygienic rating. Panels are corrosion proof, anti-mold, anti-mildew, and eco-friendly being completely recyclable.
