

Engineer.ai -Make your own apps in minutes

Build of Dream App Without Knowing Coding

Gurgaon, Mar 3, 2020 ([Issuewire.com](https://www.issuewire.com)) - AI-enabled platform, Engineer.ai (also called Builder.ai), which allows anyone to build applications & software without knowing how the code is now launched. It is a quick prototyping tool that enables businesses to bring in app ideas within minutes.

"It helps customers take their first steps in designing an app and makes their business idea a reality in less than 10 minutes. The tool also suggests real-time cost estimates and timelines for project-based features and customer needs, said [Engineer.ai](https://www.issuewire.com) CEO, Sachin Dev Duggal.

Its turnkey platform drives just about anything customers can think of, and Engineer.ai/Builder.ai CEO said, "Our AI Assembly line build tailor-made software using the collective knowledge of what has been built before." An assembly line combines reusable features with expert creators. "It is up to anyone to build a dream application. No technical knowledge is required to build your dream applications.

"Our platform essentially has an interactive dashboard with a preset template that allows users to quickly enter their requirements for the app. Once entered, a request is sent, Builder.ai's crowd-sourced pool of developers build the app, which users can regularly keep the track of," he said.
