

Experiment with iPhone camera using 7ideo, 7iew, Re7erse

The brand new line of apps has been released on Apple AppStore

Albuquerque, Apr 1, 2020 ([Issuewire.com](https://www.issuewire.com)) - Likepro LC, the U.S.-based software company, has released the line of video apps available on AppStore, includes innovative **camera app "7ideo"** (pronounced seven-ideo), external **viewfinder app "7iew"** (pronounced seven-U), **media reverse app "Re7erse"** (pronounced re-seven-ers). Targeted consumers are social media creators, major focus towards TikTok, Facebook, YouTube video content.

Innovative ["7ideo" app for iOS](#) features:

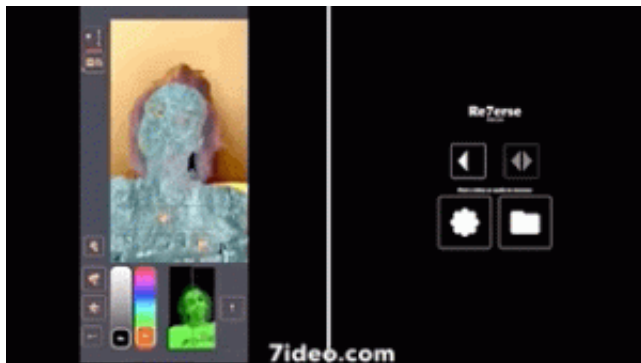

- * Original user interface design to smoothly control **zoom, focus, exposure, ISO**
- * Chroma-key style **color mask** based on camera-sourced or pre-recorded media (a green screen or variety of colors and shades can be used)
- * **Framerate ramping** with variable recording speed adjustment to add slo-mo or fast-forward velocity during video recording
- * Color palette matching with an existing photo or video asset to get a simple and easy **color-grading** alike results
- * Real-time video **presentation through AirPlay** wirelessly or using an HDMI adapter
- * Supports **external viewfinder** with included Apple Watch companion app, or through 7iew app (7iew is available on iOS, macOS, tvOS)
- * Experimental **live broadcast** feature allows sharing output video with supported third-party apps in real-time
- * Choose one of available built-in or **connected microphones** (including Bluetooth option)

Convenient [Re7erse app for iOS](#) and macOS features:

- * Up to **4K** quality **video reverse**
- * Mono or stereo **audio reverse**
- * "Boomerang" style **loop** effect
- * Extended resizing and encoding options ([available for macOS](#))

All apps are available in nine languages: English, Arabic, Hindi, German, French, Spanish, Japanese, Chinese, Korean.
