Patti the pig wore a dress made of pumpkins and hamburgers .

Winston-Salem, Mar 30, 2020 (Issuewire.com) - As Covid-19 continues to create disruption around the globe, parents, teachers, and children are in search of creative, educational and engaging ways to keep their children safe and their minds occupied.

Enter ImaginWOW. For \$1.99, the Activity App's technology feeds hundreds of silly, laugh-provoking ideas for kids (and their parents) to draw. On paper. Yep, in real life.

"The ferret drove his tractor over a pile of meatballs," says one sentence. "We went camping on the Moon and roasted tennis shoes," says another. You could imagine how silly some of these drawings come out!

Kids are engaged in no time. The slot machine-style is energizing and the giggling non-stop while the art is created.

Parents can then take a snapshot of the original art to send to family, friends, and other users through the safe, global ImaginWOW! Art Feed.

"It's mission-critical to connect kids with a creative outlet that keeps them active, engaged and off their screen," shares Dan Antonelli, co-founder of ImaginationSpring, the maker of ImaginWOW!

ImaginWOW is available in both the Apple AppStore and Google Play Stores. For more information about ImaginationSpring, visit: ImaginationSpring.com
