

Launch of Intelligent Security System

Al Khobar, Mar 23, 2020 (IssueWire.com) - Saudi controls Ltd is pioneers when it comes to providing smart integrated systems. These smart-systems enable the people to cope up with the modern trends of intelligent systems. Smart security systems are inevitable in this modern world, where the eavesdroppers and the anti-social elements with malicious intentions are always on their toes to breach the security and enter premises without getting noticed. It is inevitable always to be one step ahead in ensuring the security of your home and office. Saudi Controls has become one of the few [security system companies in Saudi Arabia](#) with the launch of this advanced security module.

While briefing the media about the launch of the new security system, the CEO of the company stated that 'we are thrilled to introduce this smart security system, because the security of the home or the office is the biggest concern of the individual, and one tries to have all the bases covered. This innovative security module will act as a master firewall in safeguarding your property'. Smart security systems are proactive in protecting your home. Security alerts can be received through smartphones, iPad, etc., providing updates on activities in and around the home or office'.

The New Launch

The launch of this smart security system will add another feather in the cap for us, and motivate us to serve the people in the best possible ways, with our intelligent and integrated systems. Smart security systems can warn you about a variety of activities on your land. Cameras can keep an eagle's eye on what's happening when you're not around and facilitates the monitoring of the home, as well as your peers behind the doors, ensuring their security at all times. Smart technology doesn't end at security. Home automation functions permit people to manage different aspects of your home, such as controlling the thermostat and the mechanism of the lights or other appliances.
