

# Logic Speak Helps Businesses Work from Home during Pandemic

## Leverages Microsoft Office365 to Enable Businesses to Stay in Business

**Roswell, Mar 27, 2020 ([Issuewire.com](http://Issuewire.com))** - Logic Speak offers support to local businesses to facilitate the transition to at-home workforces. With the influx of businesses having to work remotely, cloud-based tools and training are instrumental in companies staying productive and profitable.

“The quick shift in the market had lots of companies scrambling, but thankfully the companies we work with were equipped to work from home,” said Jason Etheridge, CEO, Logic Speak. “However, we have seen a significant increase in the need for better training in how to use more of the tools within Microsoft Office365.”

Logic Speak will offer online resources to meet the growing demand to understand the full capability of Microsoft Office365. The free, daily Office365 Empowerment training will be every day at 12PM EST the week of March 30th. For more information, visit [www.logicspeak.com/office365](http://www.logicspeak.com/office365). Logic Speak also published a list of suggestions to consider when working from home at [www.logicspeak.com/workfromhome](http://www.logicspeak.com/workfromhome).

“Things will be different for a while, but my bet is – when this is all over, we will have learned some valuable lessons and learned a few things that will help grow us into better businesses and better people,” said Jason Etheridge, CEO, Logic Speak. “In the meantime, we are all just trying to be socially responsible and professionally productive.”
