Acupuncture is a system of healthcare that has been developed, refined, and practiced in China for the past 4,000 years. In ancient times, acupuncture, along with herbal medicine, was used as the primary method of treating injuries and illnesses. It involves the superficial insertion of hair-thin needles into points on the body that have been proven to relieve pain and disease. Nowadays, most people come to an acupuncturist for medical problems that do not respond well to western medicine (such as drugs, surgery, pain killers, etc.).
