

New WiFi & GPS Dash Cam Unveiled By Zero Edge – The Perfect Road Witness To Protect You.

Zero Edge Technology LLC unveils the newest Wifi dash camera with GPS. With the free Android or iOS app, users can view, save, and share dash cam recordings direct from their phones

Chino, Mar 23, 2020 ([Issuewire.com](http://www.Issuewire.com)) - The new Zero Edge Z3D dash camera comes with WiFi connectivity. In the past, backing up or sharing dash camera footage was a laborious task that required

the user to remove the memory card or the camera from the car.

This new WiFi dashcam is hassle-free. Customers can quickly sync the camera to an Android or iOS companion app. Then with a few simple screens touches on their smartphone, consumers can playback, download, and share videos or photos.

The addition of GPS logging on this front-facing wide-angle HD dash camera shows precisely where any incident occurred, which brings peace of mind and safety to road users frightened of unscrupulous litigation.

"Working as the perfect eyewitness, this indisputable evidence can often avoid a stressful and costly court date." Said Mr. Robert Cai, head of global sales at Zero Edge Technology LLC.

"The Zero Edge Z3D dash camera uses the latest image processors to guarantee great video quality, recording at 2560x1440P. The wide-angle lenses of 150 degrees allow recording of 3 lanes of traffic, so users are sure to capture critical details like number plates." Mr. Robver Cai advised.

The dash camera range from Zero Edge now includes camera options with a compact stealth design, GPS logging, dual-lens recording, and superior low light recording.

"Whether you're a professional car for hire driver wanting to protect themselves from bad rides or just need to log the exact time and location an incident took place, Zero Edge has an option that's right for you." Said Robert Cai.

The Dash Cam Market

In 2018 the estimated global dash camera market was at \$2519 US million. It is expected to see a CAGR of 15.4% during the five years from 2019 to 2024.

This growth is in part due to the increase in vehicle ownership and the rise in auto accidents. Governments have also started mandating the installation of dash cameras.

Some prominent insurance companies introduced discounts on premiums for customers with dash cameras. This has also contributed to the market's rapid growth.

With the ongoing safety trend in Europe and North America, coupled with rapid growth from developing markets, established players such as Zero Edge are well placed to benefit.

This trend, in turn, will drive the technological evolution of the dashcam market. Customers can expect to see more cameras with modern features such as GPS, WiFi, and Advanced driver-assistance systems (ADAS).

About

Based in America, Zero Edge Technology LLC is a global player in the dashcam market.

They have been designing, developing, and selling automotive electronics products since 2013. These dash cameras are all on their website <http://zeroedgetechnology.com/>
