

The World's First Inflatable Sleeping Bag

AirBags Inflatable Sleeping Bags

Newark, Mar 30, 2020 (Issuewire.com) - www.inflatable Sleeping bag.com

Your sleeping bag sucks!

We've done a ton of scientific research and the results are in...Traditional sleeping bags are uncomfortable.

So, AirBags is here to change the way you sleep in a bag.

As the world's first line of inflatable sleeping bags, AirBags Inflatable Sleeping Bags solve virtually all of the problems with traditional sleeping bags and with traditional air mattresses. They're warmer, they're super simple, they're compact and lightweight, and they're about a million times more comfortable than your sleeping bag.

With an integrated air mattress that inflates super fast, thanks to AirBags' QuickFlate technology, you just open the valve, blow into it and you're ready for a great night's sleep...in a sleeping bag. When was the last time you said that?

You'll wake up refreshed and ready for your next adventure!

And they deflate just as easily and quickly, thanks to the unique 2 stage valve system.

Air Bags was founded by a son and his dad. Matt was pretty sure this idea was awesome, but he had never launched a product, let alone a business, before. Luckily, his dad has done this many times over.

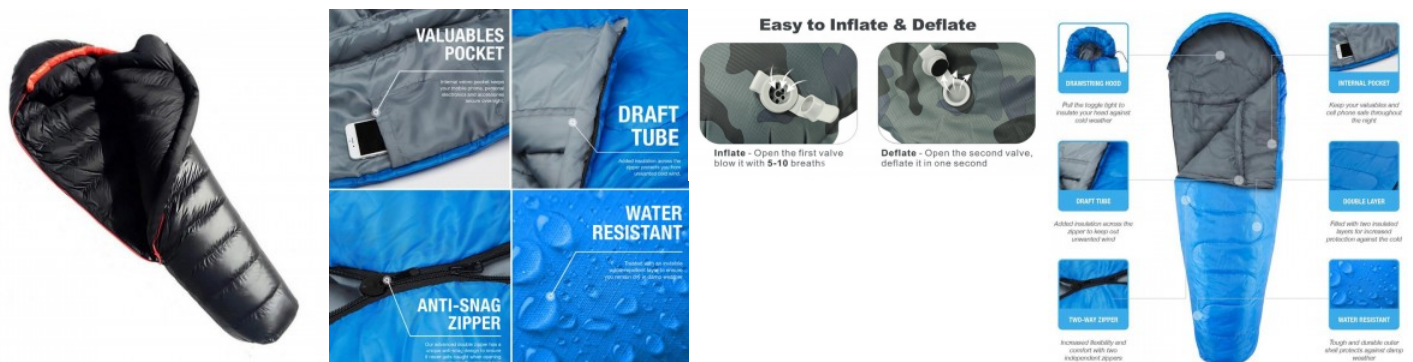

The duo spent the past two years working together to craft the world's most comfortable inflatable sleeping bag. Both will tell you that it has been an awesome experience that all started on a camping trip in Vermont.

Sitting by the fire, toasting marshmallows, Matt told his dad that he had an idea for an inflatable sleeping bag. Having spent the past two nights, and countless nights before, sleeping on the cold hard ground, his dad thought this was the best idea ever.

After months of research, and designing, building, and testing prototypes on dozens of camping trips, we finally landed on what we think is the most comfortable sleeping bag ever made.

The AirBag Inflatable Sleeping Bag was born!
