

## Vision Institute of Michigan to Offer Telemedicine

**Sterling Heights, Mar 28, 2020** ([IssueWire.com](https://IssueWire.com)) - Vision Institute of Michigan (<https://www.vimichigan.com/>) is using Telemedicine to stay in contact with patients during Governor Whitmer's stay at home order. The purpose of these Internet-based communications is to help those with eye-related emergencies.

"We at Vision Institute of Michigan want to help keep the Emergency Rooms available as much as possible for cases related to Covid-19. This is why we are introducing Telemedicine as a way for patients to safely reach out if they are facing an eye emergency. Should we need to come into the office to deal with a case we are readily available." — Dr. Mark Berkowitz

Dr. Mark Berkowitz and Dr. Sevak Valijan have a combined total of more than 30 years of experience in the field.

The employees at Vision Institute of Michigan understand the importance of following the CDC's guidelines so they are limiting the number of patients they see in the office, spacing them out, and sanitizing all equipment and every room between patients.

"Please feel free to reach out without hesitation. We are here to serve you should you be in need of assistance. By working remotely and following CDC guidelines we will all get through this together." — Dr. Mark Berkowitz

Contact the office at (586) 254-1770.
