

AlWalid Rentals launches 70m truck man-lift first time in UAE

Dubai, Apr 14, 2020 ([Issuewire.com](https://www.issuewire.com)) - Seeing the increasing demand for truck lifts, Walid rentals launches 70m truck man-lift for the first time in UAE. So far, there are many types of truck lifts available with different heights but, to facilitate people with advanced lifting equipment, Walid rentals uphold the initiative to introduce this 70m height [truck man-lift rental in the UAE](#).

The spokesperson said, “We have a wide range of boom lift trucks available with us. We give them on rental basis to make the equipment affordable for anyone around. With us, you will get truck-mounted man lifts of all heights such as 16m, 19.8m, 21m, 24.8m, 26.2m, 37m, 38m, and 45m. This time, we are introducing an all-new range with 70m height. Now, the moving of telescopic units will be easier with this truck-mounted lift. Here are some of the best uses of truck-mounted man lift.

As a crane:

A boom truck is used as a crane to perform in many hoists. For this, it is connected with a hydraulic extension. Although the capacity depends on the tonnage or specification of the truck made by the particular manufacturer, our 70m truck man-lift is an all-round in this respect. It helps in hoisting an air

conditioning unit or for any other purposes either for a residential or industrial building.

As a flatbed truck:

In many circumstances, people require to pick up items from one site and move it to another. With our wide range of boom trucks, you don't need to bother for lifting those items. We have designed the man-lift trucks in such a way so that it can carry any item irrespective of the loads or sizes. Hence, you don't need to hire a trailer or truck and crane separately for hauling one single item.

As a personnel platform

This is, in fact, one of the vital uses of man-lift trucks. In most of the constructional or industrial sites, the superior cranes need to hoist in the air to lift workers for accessing the antenna installed at the cell tower top. In such situations, you can easily hoist your technician or crew members there with this 70m truck mounted man-lift.

We are hoping to facilitate people more with this new range of truck lift.”

About AlWalid Rentals

[Al Walid Equipment Rental L.L.C.](#) is one of the leading truck-mounted lifts manufacturers in the UAE. They provide equipment on rentals to make it cost-effective for the people. The company was formed in 2009, and with its exclusive range of products and outstanding services, they have been surviving as the leading company in the country.
