

Global FranTech Group to Further License Stem Biotech Globally under a FranTech GMA.

Global FranTech Group to License Stem Biotech in 220 countries

Ahmedabad, Apr 22, 2020 ([IssueWire.com](https://www.issuewire.com)) - Global FranTech Group and FranTech Los Angeles, proposing to License Stem Biotech through a Global Marketing Agreement which grants FranTech Los Angeles the right to market Stem Biotech leading-edge research and innovation with respect to relentless Innovation in Stem Cell Therapy, bringing forward scientific and clinical advancements that prevent, treat or cure life-threatening diseases through FranTech's network of 600 partners with licensing agents in 220 countries. FranTech Los Angeles will present Stem Biotech to enterprises around the world.

"In order to see the future, we must create it," says Co-Founder Dr, Nayan Shah

Through their own research, as well as partnerships with universities, medical research institutions and other global pharmaceutical leaders, Stem Biotech is bringing forward scientific and clinical advancements that prevent, treat or cure life-threatening diseases.

Dr. Dongcheng Wu, who runs a stem cell lab in Wuhan, China - the epicenter of the COVID-19 outbreak - says he has successfully treated nine critically ill patients hospitalized with coronavirus pneumonia. Stem BioTech engineers these types of unique research partnerships to provide commercial-scale helping to address the COVID-19 global pandemic.

Their research program has achieved advancements that were once thought impossible. As they bring new products into clinical development, their goal remains the same - to discover, develop and commercialize therapeutics that transform care for people around the world.

"We believe in our approach to innovation by relentlessly pursuing the best breakthroughs in science - whether they come from within our own labs or from our partnerships with other industry leaders. With new challenges and greater potential for progress than ever before, Stem Biotech is well-positioned to build on our legacy of delivering transformational treatments for patients. We are dedicated to discovering and developing lifesaving medicines, but we also recognize that science alone can't solve the world's toughest healthcare challenges. We believe in putting patients first and we do this in numerous ways by supporting access to healthcare services around the world and by forging partnerships with patient advocacy groups and healthcare professionals"-Says the official at Stem Biotech.

The Stem Biotech Research Spans, Chemical and Biomolecule Areas with Discovery Research, Preclinical Development and Bioanalytics.

"The Stem Biotech GMA with FranTech, because of their broad expertise, tremendous geographical reach and proven track record with more than 35 years of experience will help promote the Stem Biotech Research and innovation to new geographies where they are truly needed as FranTech knows international trade policy, law, marketing, investment banking, and technology research".

Philip Nadeau, CEO of Global FranTech Group, said: "Stem Biotech with their commitment to research and innovation in the field of Stem Cell as regenerative medicine for the treatment of chronic and life-threatening diseases coupled with their value of working with many intelligent passionate people in an inclusive work environment with every person given opportunities to learn, grow and achieve their

greatest potential, having an emphasis on diversity and inclusion — is a key component to Stem Biotech's long-term and global success”.

About Stem Biotech

Relentless Innovation in Stem Cell Therapy

Through their own research, as well as partnerships with universities, medical research institutions and other global pharmaceutical leaders, Stem Biotech is bringing forward scientific and clinical advancements that prevent, treat or cure life-threatening diseases.

Dr. Dongcheng Wu, who runs a stem cell lab in Wuhan, China - the epicenter of the COVID-19 outbreak – says he has successfully treated nine critically ill patients hospitalized with coronavirus pneumonia. Stem BioTech engineers these types of unique research partnerships to provide commercial-scale helping to address the COVID-19 global pandemic.

Their research program has achieved advancements that were once thought impossible. As we bring new products into clinical development, our goal remains the same – to discover, develop and commercialize therapeutics that transform care for people around the world.
