

Kenneth V. Lieberman, MD, a Pediatric Nephrologist with Hackensack University Medical Center

Get to know Pediatric Nephrologist Dr. Kenneth V. Lieberman, who serves patients in Hackensack, New Jersey.

New York City, Apr 15, 2020 ([IssueWire.com](https://www.issuewire.com)) - Dr. Lieberman is a board-certified pediatric nephrologist who attributes his success to his enjoyment in helping others. With pediatrics, he is able to recognize the issue from the start and tries his best to ensure his patients will live the best quality of life possible.

Currently, he can be found practicing within the Department of Pediatrics at Hackensack University Medical Center in Hackensack, New Jersey. Hackensack University Medical Center is a 770-bed non-profit, research and teaching hospital located seven miles west of New York City, in Hackensack, Bergen County, New Jersey, providing tertiary and healthcare needs for northern New Jersey and the New York metropolitan area.

Professionally, Dr. Lieberman is also affiliated with Palisades Medical Center, Jersey Shore University Medical Center, and Morristown Medical Center.

In regards to his educational background, he earned his medical degree from the Albert Einstein College of Medicine - Yeshiva University in New York City, New York in 1977. He then went on to complete his internship at Mount Sinai School of Medicine, followed by his residency in pediatrics at Weill Cornell Medical Center and his fellowship in pediatric nephrology at New York-Presbyterian Hospital - Cornell Campus.

In addition to being a member of the American Society of Pediatric Nephrology, he is board-certified in pediatric nephrology by the American Board of Pediatrics (ABP). The ABP is an independent and nonprofit organization that was founded in 1933. It is one of the 24 certifying boards of the American Board of Medical Specialties.

Pediatric nephrology involves the diagnosis and treatment of patients with kidney and urinary diseases. Pediatric nephrologists, like Dr. Lieberman, diagnose, treat, and manage many disorders affecting the kidney and urinary tract, including kidney failure, high blood pressure, inherited kidney diseases, kidney stones, urinary tract infections, and abnormalities in the urine such as blood and protein.
