

## **TrustMarketHub is aimed to be the first Blockchain Based MarketHub**

Crook, Apr 27, 2020 ([IssueWire.com](https://www.issuewire.com)) - I.Introduction

### **TRUST MARKET HUB ECOSYSTEM**

Trustmarkethub ecosystem is designed to provide a fast and flexible way through which goods and services are rendered between ends, assuring service-provider and client protection through its multi-signature escrow system for all M-of-N transactions.

### **TMH Products Market**

We know that building an online store can be a terrifying thought for merchants especially when you are not techy. The Products Market is a global Market Hub for online shopping where consumers can shop

online with confidence and Merchants to Advertise and market their products freely. This is to promote easy and convenient access to top quality products across the globe.

This also provides means through which TMH registered users can purchase products outside of TMH online shop through the TMH Purchaser Agent.

## **MH Jobs & Service Market**

One major goal of Trustmarkethub project is to provide a reliable platform where everyone around the globe can render their jobs and services regardless of the distance and to propel a competitive digital labour market hub where services are provided at minimal rates.

## **TMH Token/Fiat P2P Exchange Market**

Our Token/Fiat P2P exchange Market provides regional digital exchange platform through which merchants, Jobs and service providers exchange their Token with people within the same locality in their local currencies. This also provides means for users to acquire the digital token for purchasing of products and payments of services on the TMH platform.

## **II.Token Information And Services**

### **II.A.Token Information**

TMH Token is a Cryptocurrency token that operates on the Ethereum platform designed to power transactions on Trustmarkethub Ecosystem.

#### **Smartcontract:**

**0x901fe080ee18383bf5494049538f1bca155f4d0b**

- Ticker: TMH
- Total Supply: 10,000,000,000
- Decimal: 18

### **II.B. Token Services**

#### **TMH Agent**

For Globalization, We allow registration as TMH agent. The idea of an agent is to ease admins, extend our services to all parts of the globe and to provide reliable means of earning to our community.

#### **Escrow & Collateral Service**

Our Escrow system is designed to accommodate 2-of-3 escrow services through a multi-layered blockchain to ensure buyer, seller, service provider or client protection.

#### **Business Management Software**

TMH offers an affordable, fast and reliable software system to merchants that wishes to integrate and synchronize their local business inventories with their TMH online stores inventory for smooth

management, fast financial accounts tracking and stock keeping.

## TMH Virtual and Regional Legal Services

Trustmarkethub will be hiring legal practitioners to work as virtual and regional lawyers where there be need. This is to help protect user's right and guarantee professional handling of disputes between any tier of the ecosystem.

## III.Token Economics

### Trust Market Hub Store application

Monumental Day!

Shopping gets better!

Trustmarkethub just Launched something amazing, that we know you will love!

That's all we can say for now!

## IV.Review

### Worldwide transactions

Moving money across borders quickly, reliably, and for fractions of a penny never has been too easy. With **TrustMarketHub** now we can connect users, making payments and trusting people all over the world without worrying about double spending issues.

I prefer **TrustMarketHub** because it is the first and unique cryptocurrency to provide a platform for users to earn and contribute. They keep their customers' account secure by using state of the art encryption and storing their keys locally in a secure vault on their device. It allows you to use multiple accounts, switch between all of them fluidly. I think adoption is a strong point of this project and a number of factors will play very well, **Ethereum** is part of an emerging market which is generally very friendly with blockchain technology and cryptocurrency is a low-cost solution to the market.**TrustMarketHub** is a very good and solid project, they raised only the fund they need to achieve their business goal because they are aware of what to develop.

It is a new cryptocurrency in the market, with innumerable benefits, making it an excellent company as it helps its followers and users to grow, either by proposing ideas or giving recommendations. Rated as one of the best coins on the market with great security.

These kinds of projects are those that help all its users and followers to educate themselves in the digital world of cryptocurrencies and in addition to that they take into account their proposals and ideas In order to improve your platform as such since the start of this digital world is usually difficult

What this project seeks is to facilitate interconnection between chains, reducing costs when making these interactions.

-This project aims to develop financial products such as those already known, Exchange of digital assets and fiat money in addition to a wallet.

-The token created for the platform becomes something like the ether for transactions within the network, and serve as gasoline for the maintenance and use of the network. With the particularity that these will be burned lowering the availability and possibly increasing the price of the token.

-It has as project the development of a mobile wallet and a hardware version of it, in addition to an exchange that allows fast checks and exchanges regardless of the network from which the transfer is made.

TMH was created and adopted with high expectations by the market. It may be a good bet. Those who bought for investment can make a good return on this currency.

#### Pros

1. **Privacy Focused** - TMH uses advanced cryptography to ensure anonymous transactions and data protection.

2. **Block Explorer** - TMH as a simple, straightforward block explorer where you can check the status of your transactions.

#### Cons

1. **Low Transaction Volume** - The volume of transactions on TMH is low.

2. **White Paper** - TMH white paper has little or no information that will enable a potential investor to understand the direction of the project.
