

T&T Power Group Expands Product Offering and Geography With Strategic Acquisition of 3 Phase Power Systems

Vancouver, Apr 24, 2020 ([Issuewire.com](https://www.issuewire.com)) - T&T Power Group, a leading Canadian based Corporation providing electrical generation, distribution, and application products and services announced today that it has acquired Vancouver, British Columbia based company 3 Phase Power Systems by way of a share purchase agreement (SPA).

"This is an exciting opportunity for everyone involved. The places, the products, and most importantly the people are so complimentary. This acquisition allows us to strengthen and expand our relationships with our customers across the country" explains Tyler Van Dyke, President of T&T Power Group. "We're excited that we've executed on our strategy of becoming a truly one-stop nationwide power business."

ABOUT T&T POWER GROUP

Founded in 1980, T&T Power Group provides electrical solutions including [power generation](#), [automation and controls](#), [switchgear and distribution](#), [modular electrical houses](#), renewable energy solutions and data analytics offerings. Alongside our products, T&T delivers technical services and support both on-site and remotely.

The company has offices in Moncton NB, Montreal QC, Vaughan ON, Wellesley, ON, Guelph ON, and Saskatoon SK. T&T Power Group is the Canadian Partner Distributor for Siemens Gaseous Fueled Prime Power, Peak Shaving, and CHP Solutions up to and including the best-in-class Siemens 2MWe Gas Engine.

ABOUT 3 PHASE POWER SYSTEMS (3PPS)

3 Phase Power Systems operates as an electrical solutions company and one of Western Canada's most respected suppliers of VFDs, Motor Controls, and Industrial Power Conversion Technology. As a Global Partner of the Year for Danfoss Drive Systems, they've been recognized for their ability to add

value through engineering, sales, service, and customization. 3PPS integrates premium products into power distribution and control solutions at their CSA Approved panel shops in Vancouver, and Prince George, BC.

Kam Ghuman, past President of 3 Phase Power Systems, commented “T&T Power Group’s acquisition of 3 Phase provides a fantastic growth opportunity for both businesses. With this combined team, we can better service our customers’ power challenges. As organizations continue their transition to energy management & advanced automation, we will be perfectly positioned to support them on that journey.” Kam will continue as the sales and customer support leader at 3 Phase, while working with T&T’s management to integrate the full product and service offering.

This partnership closes the gap on our ability to design and engineer holistic solutions from power generation, through distribution, and application. Our team is excited to share our expertise and we’re looking forward to the opportunity to learn from each other.” Doug Kobylanski, previous owner of 3PPS will remain on as the engineering manager for Western Canada.
