

Charles Ku, DDS, Dentist with his Private Practice

Get to know Dentist Dr. Charles Ku, who serves the population of Lewisville, Texas.

New York City, May 5, 2020 ([Issuewire.com](https://www.issuewire.com)) - Dr. Ku is a dentist currently practicing with his private practice. His patients have excellent experiences with him, one stating, "I have been going to Dr Ku's for a very long time and I can say that he is a good honest man. He does not gouge you with high prices and he tells you the truth about the care you need. I have seen my share of other dentists in the past that were more interested in making money than truly caring for their patients. Dr. Ku has my business and my respect."

He has graduated with his Doctor of Dental Surgery Degree. To earn a Doctor of Dental Surgery Degree, students generally need a four-year undergraduate education. Afterwards, they go to dental school for another four years of educational, clinical and dental laboratory training. After graduating with a Doctor of Dental Surgery Degree, dentists have to pass rigorous examinations. In the United States, dentists must pass the National Board Dental Examinations, which is a national written exam. They also have to pass a state exam to be licensed to practice there. With such extensive education and examination requirements, patients can rest assured that any dentist with a Doctor of Dental Surgery Degree is well qualified.

General dentists provide a wide array of services that are vital to patients' continued health. These services include: preventive services, including helping to maintain good oral health by stopping disease before it takes hold in the mouth; restorative services, such as receiving timely and appropriate treatment when a problem is identified; as well as cosmetic services, including performing a range of cosmetic procedures, such as teeth whitening, cosmetic bonding, and even porcelain veneers. General dentists also address overall health concerns as oral health is seen as the mirror of general health. In fact, some dental problems may reflect issues in other parts of the body and vice versa.
