

Del Sol Group extends its services to include bespoke security products

The well know brand, Del Sol Luxury Charter, are extending their services to include bespoke security products.

London, May 15, 2020 ([Issuewire.com](https://www.issuewire.com)) - The well known brand, Del Sol Luxury Charter, are extending their services to include bespoke security products. This is in line with the increasing security issues surrounding yachts of all types. It has been positively received by marinas and yacht owners alike.

Talking to Ralph Ehlers, CEO of Del Sol Luxury Charters, he stated:” We understand how serious the security threats are and have not only decided to supply and install the latest yacht security technology & associated monitoring facilities, but also made sure that our systems are affordable and cost-effective”, he continued: “Security is a major factor due to the unprecedented situation making unoccupied yachts an easy target for theft, these threats come in various forms like burglary, looting and “yacht squatting”, he concluded.

Considering the magnitude of these threats it is an impossible task for current security personnel and marina staff to monitor and act accordingly in a timely fashion. Bearing this in mind, Del Sol Yacht Security is now including security and monitoring services, they can supply and install sophisticated state of the art security technology for any sized yacht. Units and sensors are easily installed, mainly wireless, thus avoiding non-essential drilling of holes. Once installed and commissioned, the system connects via satellite, GSM or WIFI (or any combination thereof) to main Del Sol security centre, which is monitored 24/7.

With the dedicated Del Sol App, the owner or authorized personnel can monitor their yacht in real-time. If a sensor is activated Del Sol Yacht Security will action the appropriate response, either by contacting a technician, police, marina staff or fire brigade making the Del Sol Yacht Security solution the best and most complete security systems for yachts.

Del Sol's systems do not interfere with current security systems and can therefore be integrated into existing solutions and are fully compliant with International Standards. Providing systems are commissioned by Del Sol Yacht Security, several insurance companies offer discounts on insurance premiums.
