

## Diversified Crating: Quality, Affordable Custom Crates

**Gardena, May 18, 2020** ([IssueWire.com](https://www.issuewire.com)) - Diversified Crating and Packaging (<https://www.diversifiedcrating.com>) is a woman-owned, minority-owned small business Southern California that offers quality crates now at even more affordable prices.

For nearly 40 years, Diversified Crating has manufactured shipping containers and custom wood crates for the Aerospace Industry. Now, the company collaborates with premier businesses in the commercial manufacturing, entertainment, and high-tech industries throughout California.

Diversified serves clients from the South Bay, San Fernando and San Gabriel Valleys, North Orange County, South Orange County, Los Angeles, San Diego, Santa Clarita, Ventura, and Santa Barbara.

Some of the lower-cost, high-quality products they manufacture in 2020 include:

- **Production Crates**

Diversified Crating has production capabilities for manufacturing high-quality commercial and export crates of all specifications. These crates are constructed from heavy-duty floater bases or solid top bases for delicate shipping items, as well as using specialty foam products with several densities so that your products arrive safely and undamaged.

Furthermore, Diversified meets ISPM 15 standards and observes the regulations placed on their wood materials with IPCC certifications.

- **Custom Shipping Containers**

The company also manufactures custom shipping crates and containers from blueprints and drawing supplied by clients. Regardless of the requirement, Diversified Crating & Packaging has knowledgeable staff and engineering services to ensure that their custom shipping containers exceed your expectations.

- **Heat-Treated Crates**

Diversified Crating & Packaging also manufactures heat-treated crates. All their heat-treated wood shipping container and crates are stamped with their certification stamp and they provide written certification upon your request.

- **ATA Cases**

Slightly more intricate than wood crates, the company also manufactures ATA (Air Transportation Association) cases designed for cleanroom applications and aerospace.

They use special hardware and handles to design custom ATA cases that hold sensitive equipment like musical instruments and filming equipment.

Diversified Crating also offers:

- Specialty Pallet Manufacturing
- Crating and Packaging Services
- Specialty Wood Products

If you're interested and want to request a free quotation on quality, inexpensive custom commercial crating and shipping boxes, visit their website or use the contact form below.
