

Eelink Launches A Wide Range 5G GPS Trackers and IoT Devices for Transport Management and Security Needs

Internet of Things devices in transportation are rapidly increasing and changing the transportation industry.

Zengcheng, May 23, 2020 ([IssueWire.com](https://www.issuewire.com)) - *Internet of Things devices in transportation are rapidly increasing and changing the transportation industry. Eelinktech, a reliable OEM/ODM [IoT device manufacturer](#), produces various vehicle tracking devices, as communities' concerns about privacy and the security of their vehicles are increasing.*

Internet of Things (IoT) devices in transportation have become big business. The IoT transportation market was worth USD 193.60 billion in 2019 and is projected to grow USD 657.31 billion by 2025. The following factors drive the increment of IoT devices for transportation; more vehicles will become "smart", the growth of consumer IoT industry makes cars smarter and more connected. A 5G network will be available with high-speed & real-time connection and security & privacy concerns over transportation.

The IoT in smart transportation has rapidly changed the transport industry with the help of mobile and connectivity advancements. IoT devices are applied in various transport management and security. They include the application in traffic congestion control systems, trucking/transport reservation and booking systems, in telematics systems within motor vehicles, security and surveillance systems, and remote vehicle monitoring systems or GPS tracking systems. One of the [IoT device manufacturers](#) from China is ready to supply a wide range of vehicle monitoring devices. The company offers tracking devices that work with 3G to 5G networks.

Eelink Communication Technology Co Ltd is a reliable IoT device company from China. The company has more than 16 years of experience in producing and selling communication terminal products. The company specializes in producing GPS tracking devices for industrial and personal use. *"We are a leading [IoT sensor manufacturer](#) in China. We offer a wide range of versatile IoT devices that include GPS tracking software, IoT devices, IoT sensors, and Cellular Asset Tracking. We also produce tracking devices for Motorcycle tracking, Cargo Container tracking, GPS tracker for cars, GPS tracker OEM, and many more."*

About Eelink Communication Technology Co Ltd

Eelink Communication Technology Co Ltd is a certified company that designs and manufactures GPS trackers and IoT devices based on the needs of its clients. The company is backed by experienced engineers and workers producing customized vehicle/personal tracking systems that are suitable for car rental solutions, Fleet management solutions, Trucking & logistics solution, School bus management systems, Secure transportation solutions, Employee management, and Operation centric solutions.
