

## Hidden Hills Launches Generation 2 Watch in Silver & Black Face

Hidden Hills Watch Company is now accepting pre-orders for the 86,400 Generation 2 watch.

**Halifax, May 29, 2020 ([Issuewire.com](https://www.issuewire.com))** - Hidden Hills Watch Company is now accepting pre-orders for the 86,400 Generation 2 watch. The available face options are Silver and Black. The 86,400 will be made available through the online store immediately. After completing a successful launch and producing 1,840 Generation 1 watches under the 86,400 line, Hidden Hills is anticipating continued explosive growth through the release of Generation 2.

**Serial Validation** - A key feature available with all Generation 2 watches is the ability to validate the authenticity of any given watch using its provided serial number. Whether purchasing directly from Hidden Hills or any other source, customers can find peace of mind knowing their watch bearing the exclusive Hidden Hills Watch Co. emblem is 100% genuine and was indeed designed and produced by the Canadian based Company.

**QR Manual** - The 86,400 Generation 2 watch is sold in a completely redesigned package. Replacing a previous paper manual, the Generation 2 box includes a QR scan code affixed inside the cover to allow quick and easy access to the brands resources page where customers can find link removal plus date and time change instructions as well as general information and product details. This code can be scanned using any modern smartphone camera and provides direct link access to the site.

Hidden Hills Watch Company has reached over 33,000 followers on Instagram and 20,000 followers on Facebook in just a few short months following the launch. This social media presence is expected to continue growing.
