

Introducing a powerful platform that makes restaurant management effortless.

And it's completely free, forever

Montreal, May 18, 2020 ([IssueWire.com](https://www.issuewire.com)) - Piecemeal is a free management platform aimed at automating and simplifying the work of restaurant managers that includes modules that cover inventories, menu engineering, scheduling, purchases, and food preparation.

The platform was designed and developed to help restaurant managers automate the most repetitive tasks and operations, to increase their efficiency, minimize their losses, and thus improve their profit margins. Piecemeal uses cutting-edge technology to make using its modules quick and simple. For example one of the many features is that you can import your invoices in real-time by using a picture or a PDF which will update your menu costs and on-hand quantity automatically. Saving restaurants about 3 to 5 hours a week to track inventory.

Launched in late 2019, the platform now serves close to 300 restaurants in many countries around the world, including the United States, Canada, France, and Hong Kong. The innovative business model is allowing Piecemeal to scale globally and to become a go-to resource for restaurant and foodservice operators.

Considering the current crisis, Piecemeal is more relevant than ever for any entrepreneur or manager anxious to prepare and ensure profitability with the new rules our industry is faced with.

To try it out, restaurant operators are invited to visit <https://www.piecemeal.io> where they can create an account using an email address. The Piecemeal support team is available to answer any questions they could have and help them learn how to use the platform efficiently. Also, free training sessions on how to use Piecemeal are offered every month for users to do a deeper dive into getting results for their businesses.
