

MONITORAPP web application firewall now available in AWS Marketplace

Flexible Pay-As-You-Go product provides Amazon Web Services users access to a secure web application firewall in mere seconds.

MONITORAPP

Ontario, May 12, 2020 ([Issuewire.com](https://www.issuewire.com)) - MONITORAPP, Inc., a leading provider of multiple security solutions, announced [MONITORAPP's Application Insight Web Application Firewall \(AIWAF\)](#) is available on AWS Marketplace. Amazon Web Services (AWS) users can now launch MONITORAPP's AIWAF with a single click. The product provides users with a broad range of subscription options with Pay-As-You-Go pricing so that the customers can pick a product that best suits their business needs. MONITORAPP is offering a 30-day free trial of their WAF and money-saving discounts are offered for longer duration subscriptions purchases.

With so many infrastructures moving to the cloud, security has to move forward with it. MONITORAPP AIWAF brings all the security benefits of an on-premise appliance with the flexibility of a cloud appliance.

MONITORAPP AIWAF is updated constantly by its own Threat Intelligence Platform (AICC) to offer protection based on the analysis of machine learning (ML) data and can secure a client's application from even the newest threats. AIWAF also provides its own load balancing and health check without the need for a separate load balancer, enabling efficient traffic handling for multiple web servers serving the same domain while saving costs for clients. Its adaptive profiling technology is designed to distinguish between normal and abnormal requests, providing users with uninterrupted web service while providing world-class security and peace of mind.

As a veteran of a security appliance vendor (since 2005), our AIWAF was born out of the on-premise appliance and optimized for the cloud. AIWAF provides all the security of an on-premise appliance with the flexibility, scalability, and low maintenance of the cloud.

"We pride ourselves in our research and development department and the innovation produced by them," said Kyle Lee, CEO of MONITORAPP. "By forming a relationship with AWS and making MONITORAPP available in AWS Marketplace, I am excited to announce that our product is, now, even more, approachable and accessible."

About MONITORAPP

MONITORAPP is a security solution vendor that researches and develops a variety of application acceleration and application security technologies. Our products are based on industry-leading proxy

technology to ensure a fast and secure application environment. We've recently expanded our services to the cloud environment for easier and faster access to our industry-leading security technologies, making the world a safer place.
