Delhi, May 4, 2020 (Issuewire.com) - Established in the year 2001, WebTek Labs started its journey with the goal to offer the best staffing as well as recruitment service to the willing students. After that, it ventured into the field of offering industrial training on multiple subjects. The best thing is that this training has hired a team of experienced and certified trainers for this purpose.

At this industrial training in Delhi offered by WebTek Labs, you have the option to choose multiple courses that include Java, PHP, Software Testing, Embedded and Robotics, Ethical hacking and cybersecurity, Big Data and Hadoop programming and so on. In fact, Java is in demand and this Java training course provided by this institute covers up different topics related to core and advanced Java. [Data analysis using python](#) is another important course provided by WebTek Labs that you can opt for.

WebTek Labs has proven expertise of training lakhs of students from across the world and it has entered the partnership with the leading companies that are related to banking, media, and hospitality sector and so on. The best thing is that you can participate in the classroom lectures and at the same time you can work on live projects in order to enhance their practical knowledge. The course curriculum may be designed as per the current trends of the industry and the fees also are affordable so that one from the low-income group can get enrolled in this course without much hassle. You can also enjoy batch flexibility and the classes are mostly organized on evenings, weekends and also on Sundays. Back classes if you miss them and doubt clearing sessions at free of course are available for them. When you complete this course you can get the internationally recognized certificate from WebTek Labs along with the partner logos. The placement assistance is offered by this company and many of them are now successfully place in the top-notch companies of the world.
