

SkillChain (SKI) gets listed on Probit Exchange

Lugano, May 19, 2020 ([Issuewire.com](https://www.issuewire.com)) - [Skillchain](#) (SKI) continues the listing process and it has now been listed also on [Probit](#), one of the leading Korean exchanges.

[Skillchain](#) is a **blockchain**-based platform which allows people to certify, in a permanent way, their skills, job experiences, academic certifications and recommendations.

From today, 18th May 2020, the **SKI** token can be traded also on the exchange [Probit](#), on SKI/USDT.

[Probit](#) is different from other exchanges because it targets professional traders and describes itself as a global coin-to-coin cryptocurrency exchange.

They only list what it deems to be 'qualified and deserving' cryptocurrency projects and reportedly have an order matching speed of over 1.5 million orders per second and a customizable user interface.

Also, they claim to provide users with the option of a hardware security key in addition to 2 Factor Authentication.

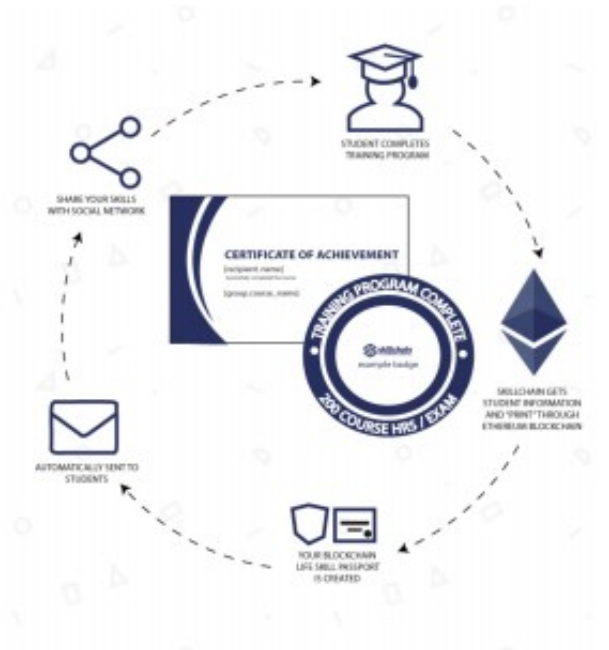

[Probit](#) is now ranked #38 on CoinMarketCap, by trading volume, and it's the 3rd biggest overall Korean exchange.

During last month, the SKI (Skillchain) token had an impressive performance, greater than **Bitcoin (BTC)**!

So far, SKI token is listed on 3 exchanges: **Bitmart**, **Catex**, and **Probit**.

With this latest listing, **Skillchain** officially enters the growing Asian market and confirms the plan of expanding their community and creating new business relationships across the world, before the launch of **Skillchain 2.0**, scheduled for September 2020.
