

T. Edward Huang, MD, MS, an Infectious Disease Specialist with Metro Infectious Disease Consultants, LLC

Get to know Infectious Disease Specialist Dr. T. Edward Huang, who serves patients in Elgin, Illinois.

New York City, May 7, 2020 ([IssueWire.com](https://www.issuewire.com)) - Dr. Huang is a board-certified and fellowship-trained infectious disease specialist with Metro Infectious Disease Consultants, LLC in Elgin, Illinois.

Based on the philosophy that strategic growth and market neutrality would optimize patient care and physician lifestyle, Metro Infectious Disease Consultants, LLC has grown to be the largest infectious disease group in the country. At the present time, it is composed of over 100 ID physicians working in multiple states. Outpatient antibiotic therapy is available at each of the offices and a Hospital Avoidance Program has been implemented.

In his current capacity, the doctor is affiliated with Advocate Good Shepherd Hospital, Advocate Sherman Hospital, Northwestern Medicine McHenry Hospital, Northwestern Medicine Huntley Hospital, and Northwestern Medicine Woodstock Hospital.

A graduate of the Ross University School of Medicine in Barbados, Dr. Huang relocated to the United States to further his education. He completed his internship and residency in internal medicine at West Suburban Medical Center Program in Oak Park, Illinois, followed by his fellowship in infectious disease at the Medical College of Wisconsin in Milwaukee.

Following his training, he became board-certified in internal medicine and infectious disease by the American Board of Internal Medicine, a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world.

Infectious diseases, also known as infectology, is a medical specialty dealing with the diagnosis, control, and treatment of infections. The role of an infectious disease specialist is to review a patient's medical data, including records, X-rays, and laboratory reports. They may perform a physical examination, depending on the type of problem. Laboratory studies are often necessary and may include blood studies and cultures of wounds or body fluids.
