

TDM Selected to license ‘The Waterhound Solution’ software in the Philippines

Breakthrough Signature SaaS Wastewater-Treatment Analytics available in S.E. Asia

Metropolitan Manila Area, May 24, 2020 ([Issuewire.com](https://www.issuewire.com)) - Total Development & Management, Inc. ([TDM](https://www.tdm.com.ph)) was selected to provide Waterhound Futures’ predictive software diagnostics, collectively known as “The Waterhound Solution™,” to the Philippine industrial wastewater treatment marketplace. TDM is a well-established engineering services provider that will handle marketing, sales, performance audits and installation. [Waterhound Futures](https://www.waterhoundfutures.com) provides software, simulators, and predictive diagnostics.

“We look forward to working with Waterhound Futures to bring the cost savings and environmental benefits of this software to our customers in the Philippines,” said Doug Broughton of TDM.

TDM has the engineering talent to introduce the Waterhound Solution™, and explore clients’ needs to optimize the performance of their wastewater treatment assets. TDM’s principal, Doug Broughton has three decades of experience in designing, building and retrofitting food and beverage plants in South East Asia.

“We are excited to announce this engagement with TDM, a prominent engineering firm,” said Julie King, Waterhound Futures Managing Director, International. “This is a great opportunity to both introduce and further beta-test our award-winning Waterhound Solution in a thriving industrial marketplace with a

constant need for up-to-date, accurate monitoring of all water treatment processes. The Waterhound Solution provides innovative predictive maintenance, not just routine or reactive maintenance. Our software accurately predicts problems before they begin, saving companies time and money.”

About Total Development & Management, Inc. (TDM)

TDM offers expertise and innovative systems of sustainable design while providing efficiency in cost and operation. Specializing in the food, brewing, spirits, and dairy industry, TDM brings 40+ year of experience covering a broad range of project management and design issues to its process systems. About Waterhound Futures, Ltd.

Founded in 2019, Waterhound Futures develops software that enables engineers and managers to optimize performance and reduce costs for water and wastewater treatment systems. Guided by the vision of founders Julie King and Michael Levey, Waterhound Futures seeks to eliminate contamination of freshwater resources by untreated wastewater, using proven calculations and predictive models collectively called The Waterhound Solution. The company has already been acknowledged for its contributions, with awards like The Water Council’s AI Tech Challenge in January 2020. Waterhound Futures has designed and built systems in use by Ford, IVECO, Caterpillar, Fiat, Nestlé, Halliburton, ExxonMobil and Baker Hughes. Learn more at: www.WaterhoundFutures.com.
