

BizCloud Experts announces acceptance into Amazon API Gateway Service Delivery Program

Deliver Restful API's and deploy highly scalable & secure serverless backend services with confidence

Dallas, Jun 26, 2020 ([Issuewire.com](https://www.issuewire.com)) - UberTejas LLC dba [BizCloud Experts](https://www.bizcloudexperts.com) announces their acceptance into the Amazon API Gateway Service Delivery Program. [Amazon API Gateway](https://aws.amazon.com/api-gateway/) enables enterprises to create, publish, maintain, monitor, and secure APIs at any scale. APIs act as the "gateway" for Mobile, Web and B2B applications to securely access data, business logic, or functionality from your backend services.

BizCloud Experts' core competency of creating [Serverless](#) & [Contact Center](#) Solutions is further enhanced with acceptance to Service Delivery Program for Amazon API Gateway. API Gateway allows our developers to create RESTful APIs, WebSocket APIs that enable real-time two-way communication applications and seamlessly scale to handle hundreds of thousands of concurrent API calls.

Some recent use cases in which BizCloud Experts Engineers have enabled using Amazon API Gateway for our enterprise customers are:

1. Developing backend API services for Mobile/Web and SaaS applications
2. Delivering Contact Center Statistics to Management Portals to provide insights and KPI dashboards
3. Enhancing Call Flows by creating data dips interacting with legacy applications and systems

4. Deploying backend services for Connected Vehicle Solutions like curbside delivery, restaurant finder.

"We were an early adopter of AWS Lambda," says [Nagesh Kunamneni](#), President & CTO, BizCloud Experts. "Now being recognized for Amazon Connect, Cloud Formation, and Service Catalog positions, BizCloud Experts uniquely delivers highly scalable serverless backend services that power next-generation contact centers, mobile, web, and data-driven applications". At BizCloud Experts, our vision is to help enterprises adopt/migrate to serverless application architectures in an agile and cost-effective way.
