

BizCloud Experts Announces New Specialization : AWS Cloud Formation

Deliver Infrastructure-as-Code (IaC) with Confidence

Advanced Consulting Partner

AWS CloudFormation

AWS Service Catalog

AWS Lambda

Amazon Connect

Dallas, Jun 12, 2020 ([IssueWire.com](https://www.issuewire.com)) - UberTejas LLC dba BizCloud Experts announces being accepted into the [AWS Cloud Formation Specialization](#). AWS CloudFormation allows enterprises to use programming languages or code to model and provision, in an automated and secure manner, all the resources needed for applications across all AWS regions and AWS accounts. Automating resource provisioning helps secure the knowledge, eliminates the need to manually update run-books, and make the provisioning process highly repeatable. At BizCloud Experts our mission is to ensure customers can adopt “DevOps” practices seamlessly.

Our core competency of creating Service Catalogs, building Serverless Solutions, and now with AWS Cloud Formation specialization we can model, provision, & standardize infrastructure components used across your organization, enabling configuration compliance and faster troubleshooting. "We believe it is natural to treat all aspects of enterprise solutions engineering as delivering code in an agile way," says [Nagesh Kunamneni](#), President & CTO, BizCloud Experts. "build once, deploy anywhere, anytime and any number of times is a key design pattern for the future of solutions engineering". Working together we can improve IT Agility and help build new experiences faster.

Using a combination of AWS Cloud Formation, AWS Lambda, and AWS Service Catalog, BizCloud Experts has enabled the following use cases: empowered sales team provision products for demo's, proof of concepts eliminating significant time, engineering and support; simplified development process by automating rapid tear down and deployment of complex infrastructures for development, testing and production rollouts improving speed and agility; and replicated solutions across regions to expand reach globally.

This vision/strategy also aligns with where our enterprise clients are headed. "The BizCloud team brought in their expertise of Agile, DevOps, and Serverless solutions along with their architecture and advisory services," says [Hemanth Jayaraman](#), Director, DevOps & Cloud Center of Excellence at Neiman Marcus. "This allowed the team to rapidly optimize data lake costs and leverage it as the foundation for a data scientists decisioning platform. Their knowledge of AWS services accelerated our digital transformation through workload automation, and they helped reduce the risk of business and operations by moving our data to a more resilient and secure IT environment".

ABOUT BIZCLOUD EXPERTS

BizCloud Experts is recognized as a leader in developing solutions using serverless computing technologies, contact center solutions, and automating IT services. BizCloud Experts is an AWS Advanced Consulting Partner that helps customers of all types and sizes design, architect, build, migrate, and manage their workloads and applications on AWS, accelerating their journey to the cloud learn more, visit <https://www.bizcloudexperts.com> or follow us on [Linked-In](#), [Twitter](#), FaceBook.
