

GPSWOX becomes a GPS tracking market leader in 2020

South Australia, Jun 6, 2020 (Issuewire.com) - Headquartered in London, UK, and with offices in over 2 different continents, GPSWOX has become a market leader in the telematics and GPS tracking software industry as an innovator, producer, and distributor of industry-leading GPS tracking software. GPSWOX has garnered a proven track record of excellence and delivering on the promises they set forth to their clients.

GPSWOX has strived to become a world-class leader, designer, and manufacturer of industry-specific GPS telematics and tracking software and today have an extensive portfolio of services that include white-label software, fleet tracking software, and personal tracking software.

GPSWOX software can be used for a variety of different use-cases; from tracking fleets of vehicles and safeguarding valuable personal belongings, to tracking personnel and staff members employed by businesses or governments.

High satisfaction with its clients

Because of dedication to the customers and focus on delivering the best GPS tracking software available on the market today, GPSWOX has acquired a number of awards from FinancesOnline, a website that reviews best-in-class B2B SaaS solutions.

For example, Finances Online awarded GPSWOX its prestigious *Expert's Choice* award. That same year, they also received the *Supreme Software Award* for offering the highest level of customer service that has ever been made available in the GPS tracking software industry. Lastly, they have also received the *Great User Experience* award when FinancesOnline took note of the fact that GPSWOX software has been made with an easy to use, user-friendly interface.

Today, GPSWOX has over 1,500 satisfied business clients from all reaches of the modern world. Their software is used to track large fleets of commercial vehicles for clients that include the likes of Watu Credit Ltd from Kenya, NCT Support from the USA, Viewtech from Lebanon, and YouTrace from Belgium. Their tracking software is ideal for various industries that include the automotive industry, healthcare, logistics, retail, government, and hospitality.

A truly global brand

GPSWOX has over 100,000 global users, track over 1.5 million individual units of vehicles, goods, or personnel, and have collected over 145 billion data points. GPSWOX places a heavy emphasis on creating their software with hardware interoperability in mind.

GPSWOX has a mobile app that works on most of today's smartphones that are running iOS or Android. For commercial applications, GPSWOX is compatible with state-of-the-art hardware that includes GPS tracking manufacturers such as Teltonika, ATrack, Concox, Meitrack, Ruptela [see full list of supported devices](#).

Going forward, GPSWOX has set for themselves a rigorous roadmap to provide state-of-the-art software and user-friendly applications that meet the demands of clients in all countries that they currently serve.

From prototyping new software to QA testing, from final product roll-out to customer service, they continue to set the bar as the industry leader in telematics and GPS tracking software. As always, they will undoubtedly uphold their three main pillars of values that they hold near and dear to their heart that include trust, quality, and service.

If you want to learn more about GPSWOX and the brilliant work that they do, feel free to drop by their trade booth at one of the industry's largest trade shows this year, or **contact them directly**.
