

iOPEX Technologies receives 2020 Workato Partner Award for Automation Center of Excellence

iOPEX Technologies won the Automation Center of Excellence and received this prestigious honor during Workato's 2020 Partner Summit

San Jose, Jun 25, 2020 ([Issuewire.com](https://www.issuewire.com)) - iOPEX Technologies today announced it was named a winner of the 2020 Workato Partner Awards. Specifically, iOPEX Technologies won the Automation Center of Excellence and received this prestigious honor during Workato's 2020 Partner Summit, held virtually on June 10th, 2019 with over 600 registered partners.

The award distinguishes iOPEX Technologies as a premier systems integrator for Workato solutions to deliver digital operations through integration and automation solutions. Besides, it acknowledges the company's value to taking simple and scalable solutions to the enterprise to achieve [robotic and analytic process automation](#).

"Our partners are not just implementing Workato, but are also the experts in their field. iOPEX is a thought leader when it comes to digital operations, including Operations Automation, Application Modernization, Analytics, and AI. Additionally, they understand how Workato is relevant to all these topics. iOPEX also has the Digital Benchmarking methodology to guide clients on how best to tackle digital operations," said Markus Zirn, VP of Business Development at Workato.

"This recognition resonates to iOPEX's automation trilogy (RPA, APA & Low Code/No Code) that an enterprise should adopt for building digital platforms to optimize operations. As Workato's premier partner, iOPEX is positioned well to drive digital innovation and bring continued value to the clients and scales businesses globally", said Nagarajan Chakravarthy, Chief Digital Officer, iOPEX Technologies.

Workato is a platform for Enterprise Automation providing modern, intelligent integration and process automation. As an early partner of Workato, iOPEX Technologies empowers clients by enabling both business and IT users to deploy automation without compromising security and governance.
