

Kospet Introduces the World's First Android Based Smartwatch With Face ID Technology "Kospet Prime SE"

Beijing, Jun 24, 2020 ([IssueWire.com](https://www.issuewire.com)) - In quest to continually push the boundaries in the industry; professional smartwatch manufacturer Kospet is thrilled and excited to introduce the Kospet Prime SE, the world's first android based smartwatch with face recognition technology that extracts up to 1068 facial features, unlocking the smartwatch just on a hand lift. This classic smartwatch is available on Kospet website <https://www.kospet.com/> and all online stores at an incredibly affordable price.

Over the years, Kospet has delivered consistently high levels of reliability, durability, performance, and value that have endeared it to lovers of smartwatches worldwide. With the creation of the new Prime design and awesome features, this much-loved timepiece is re-born. This fantastic smartwatch which a new edition to the Kospet Prime delivers a breakthrough in the battery life of Android smartwatches with a 1260 mAh large battery which is nearly 40% more than the highest capacity battery in the market.

In addition to the fundamental values of Kospet, Prime SE offers enhanced customization tools and powerful new health and fitness features to the world's most advanced smartwatch giving its distinctive appearance and strength. The Kospet Prime SE inherited the exterior looks of the Kospet Prime, making it a more spectacular smartwatch with a silicone strap and a metal watch. With dual cameras: 2.0MP front camera is centered on the watch with the most reasonable viewing angle and 8.0MP side camera brings the coolest shooting experience. It is moderately waterproof and has two physical buttons.

Personalization is taken to an entirely new level with shareable and discoverable watch face configurations, while sleep tracking, additional built-in professional sports modes including fitness and professional exercises, and a new hearing health feature give greater insight into overall well-being and are designed with privacy in mind. Conveniently on the wrist, Maps is updated with cycling directions

and to record exercise routines accurately.

This smartwatch with allows for enjoyment of high-quality voice calls runs on an Android 7.1.1 operating system and supports all google applications including third-party applications on google play store. It supports 4G networks of TDD LTE and FDD LTE, and it's compatible with WCDMA, GSM and other bands in most countries and regions around the world.

“We’re dedicated to making KOSPET a smartwatch brand that consumers adore and are excited to deliver meaningful new tools that support their health, fitness, and wellness,” said Mr. Wu(Founder).
