

SimilarPNG Launches a Free Service Where Everyone Can Download Unlimited Royalty-Free PNG Images

Tucson, Jun 11, 2020 ([Issuewire.com](https://www.issuewire.com)) - SimilarPNG, an online image sharing platform, has launched a free service to download unlimited royalty-free PNG images on an easy-to-use platform.

The new SimilarPNG platform has made it possible for registered users of the site to download all types of royalty-free PNG images including clip arts and icons with transparent backgrounds and best resolution for free. In compliance with copyright laws, the site owners are now providing their users with access to images with no royalty and other legal restrictions.

While launching the new service, SimilarPNG's leading developer stated that they are now offering their users and everyone across the globe free access to high-quality photographs and images that are over 1500 pixels by 1500 pixels.

The service is designed to give graphic designers and the average user a way to solve their graphics challenges and save time when working on projects that require royalty-free images, clipart, and icons. At the launch of the service, SimilarPNG had over 250,000 PNG images freely accessible to the platform's users.

According to the website's developer, the goal of the new service is to help everyone, from the average YouTube channel owner to small business owners looking for simple logos and photography hobbyists, easily search and find relevant images for their projects free of charge.

"Our service was launched as a response to the increasing demand for ready-to-use transparent PNG images as more people turn to browser-based graphic design tools," he said.

"Photoshop and its free alternatives such as GIMP and Pixlr have helped millions of people over the years create and modify images to their preferences but in today's fast-paced life people need a resource where they can quickly search and find the right image for their project, whether on desktop or mobile. That's the exact philosophy behind the development of SimilarPNG."

The new PNG resources platform at SimilarPNG promises users a huge and diverse database of thousands of transparent PNG images from royalty-free libraries including free clip art, icons, and 3D rendered objects designed to make everyone's design experience easier and less cumbersome, especially those working with web-based design tools.

The developers of the new platform also spoke about a few more additions to the site such as the ability for users to upload and filter their own images. SimilarPNG's image library now includes an advanced filtering system that allows users to sort their preferred files based on different filters such as popular, recent, category, resolution, and color.

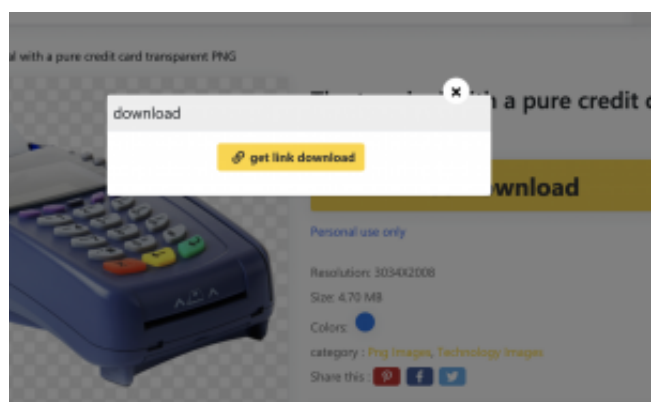

The free PNG images can be further filtered by type subcategories such as 3D, Splash, Logo, Camera, and many more.

About SimilarPNG

SimilarPNG is an image library that specializes in providing its users with access to royalty-free images, clip art, and icons on a user-friendly platform.

The website currently contains more than 250,000 transparent images including PNG images and PNG Vectors. The website also provides free Reverse Image Search services to its visitors.

To use the new PNG service, users are only required to register and log in.
