

Thoracic Drainage Devices Market Size By Product, By Application, By End User, By Geographic Scope

Thoracic Drainage Devices Market Size By Product

Jersey City, Jun 2, 2020 (www.issuewire.com) - Thoracic Drainage Devices Market Size And Forecast

According to Verified Market Research, The Global Thoracic Drainage Devices Market was valued at USD 612.14 Million in 2019 and is projected to reach **USD 894.8 Million by 2027**, growing at a **CAGR of 4.90 % from 2020 to 2027**.

The Global Thoracic Drainage Devices Market report provides a holistic evaluation of the market for the forecast period. The report comprises various segments as well as an analysis of the trends and factors that are playing a substantial role in the market. These factors; the market dynamics involve the drivers, restraints, opportunities, and challenges through which the impact of these factors in the market is outlined. The drivers and restraints are intrinsic factors whereas opportunities and challenges are extrinsic factors of the market. The Global Thoracic Drainage Devices Market study provides an outlook on the development of the market in terms of revenue throughout the prognosis period.

What are Thoracic Drainage Devices?

A thoracic drainage device often called a chest pipe is a flexible plastic tube that is inserted through the thoracic cavity into the pleural space or mediastinum. Most commonly, drainage systems use three chambers based on three-bottle system. The first chamber collects the fluid from the chest, the second chamber functions as a water seal, which acts as a one-way valve allowing gas to escape but not to reenter the chest. The third bottle is used to remove air in the case of pneumothorax or fluid such as in the case of pleural effusion, blood clots, or pus when empyema occurs from the intrathoracic spaces. These devices are proven to be comfortable, safe, and well-tolerated during the withdrawal of thoracic drainage from the patients. Since it is capable of quick drainage withdrawal, thus it allows reducing or eliminating the cost of hospital stay.

In the report, the market outlook section mainly encompasses fundamental dynamics of the market which include drivers, restraints, opportunities and challenges faced by the industry. Drivers and Restraints are intrinsic factors whereas opportunities and challenges are extrinsic factors of the market.

Factors such as advancements in surgical technique, rising awareness amongst people about chest pipes, and overall urge for quick hospital discharge to the patients are driving the growth of the market. The device is popularly used in conditions such as severe paralytic conditions. However, high cost and lack of mass range production are limiting market growth during the forecast period. Implementing advanced technologies in the device can be an aspect of market opportunity.

Verified Market Research narrows down the available data using primary sources to validate the data and use it in compiling a full-fledged market research study. The report contains a quantitative and qualitative estimation of market elements that interests the client. The “Global Thoracic Drainage Devices Market” is mainly bifurcated into sub-segments which can provide classified data regarding the latest trends in the market.

Global Thoracic Drainage Devices Market Competitive Landscape

The “Global Thoracic Drainage Devices Market” study report will provide a valuable insight with an emphasis on the global market including some of the major players such as Teleflex Incorporated, Vygon SA, Medtronic, Cook Medical, C. R. Bard, Inc. (BD), MAQUET Holding B.V. & Co. KG (Getinge AB), Utah Medical Products, Inc., Smiths Medical (Smiths Group plc), ATMOS MedizinTechnik GmbH & Co. KG, Sinapi Biomedical., and Others. Our market analysis also entails a section solely dedicated to such major players wherein our analysts provide an insight into the financial statements of all the major players, along with its product benchmarking and SWOT analysis. The competitive landscape section also includes key development strategies, market share and market ranking analysis of the above-mentioned players globally.

Thoracic Drainage Devices Market, By Product

- Pleural Drainage Catheters
- Secured Needles
- Thoracic Drainage Kits
- Thoracic Drainage Systems
- Others

Thoracic Drainage Devices Market, By Application

- Cardiac Surgery
- General Intensive Care Emergency Medicine
- Infectious Diseases

- Oncology and Pain Management
- Others

Thoracic Drainage Devices Market, By End User

- Ambulance Services
- Ambulatory Surgery Centers
- Hospitals and Specialty Clinics
- Military Surgeons
- Others

Thoracic Drainage Devices Market, By Geographic Scope

- North America
 - o U.S.
 - o Canada
 - o Mexico
- Europe
 - o Germany
 - o UK
 - o France
 - o Rest of Europe
- Asia Pacific
 - o China
 - o Japan
 - o India
 - o Rest of Asia Pacific
- Rest of the World
 - o Middle East & Africa
 - o Latin America
