With recent transformations in the travel industry, the highly personalized client service from the traditional travel agent has almost completely been replaced by online customer self-service. We help travel agencies innovate and run their businesses and fulfill the brand promise by creating a versatile travel solution that's constantly optimized. In partnership with 200+ leading global suppliers and 35000+ Direct Contracts to give you real-time access to over 600,000 hotels and to ensure that you cover the globe.

Gain a competitive edge by leveraging BookingXML's expertise and technology designed to help differentiate your brand and increase your market position.

Hotel Extranet offers different distribution channels to manage your own inventory from your direct contracts with Hotels. It includes online distribution / complete information for resorts, hotels etc. Hotel Extranet System acts as a single application that enabling travel agents to upload their own contracted hotels (Nego) and provide them with access to their online system so that they can enter their hotel's description and information regarding room availability, prices, special offers, and restrictions. BookingXML develops hotel extranet system that helps travel agencies manage sales, download and manage pricing tables, booking confirmations and special offers. Travel agents and online hoteliers can easily manage their inventory within the central reservation system or extranet hotels.
