

UPES offer PGP course in Renewable Energy Project Finance and Electric Vehicle Powertrain with GATE Trust

Renewable Energy and EV development and its implementation in Industry

Academic Partner

Howrah, Jun 24, 2020 (Issuewire.com) - Global Advanced Training and Educational Trust and University of Petroleum and Energy Studies collaborate to offer PGP course in Renewable Energy Project Finance and Electric Vehicle Powertrain

[Global Advanced Training and Educational Trust](#) (GATE Trust) is an academic institute and its unit Institute of Solar Technology (IST) and [Academy of EV Technology \(AEVT\)](#) India top Entrepreneurship Development Institute.

[Institute of Solar Technology \(IST\)](#) is a well-known solar training institute in India and Worldwide. They have trained engineers and Startups in PAN India and the UK, Oman, Zimbabwe, Cambodia and other countries. May of they completed MW Solar Power plant project also.

Renewable Energy Project Finance program intends to make an exceptional professional in renewable energy project to pursue a career at mid or senior finance management level in the Renewable Energy sector. It covers every key concept, India and International best practices and along with key financial management skills needed.

With the demand rising exponentially, a significant skill gap is also observed in the industry. Companies are finding it difficult to find the right talent for positions like Analyst, Project Finance, Renewable Energy Finance Project Manager and other similar roles. To address this skill gap, Institute of Solar Technology and UPES in India have come together as the academic partner to bring quality education and industry exposure to students and working professionals interested to tap the emerging opportunities in this sector.

Electric vehicles are an emerging field so that while professionals with the right experience and skills existed in the market, finding and engaging with them would not be without its challenges. Electric Vehicle Powertrain program intends to make an exceptional professional Ev EVSE development in Electric Vehicle sector.

On this collaboration, Ashok Sahu, Head – Centre for Continuing Education, UPES said “UPES

envisioned itself as an institution of global standing, which fosters the development of professionally competent talent and contributes to nation-building. Continuing this movement forward, UPES had become an academic partner of GATE Trust for its programs in Renewable energy and Electric vehicles.”

Sanjib Roy, Chairman, GATE Trust said “GATE Trust and UPES’s collaboration will help the students and people with experience equally to get a complete perspective on Renewable Energy and EV development and its implementation in Industry. We are confident of its success.”
